# List of culinary herbs and spices

This is a list of culinary herbs and spices. Specifically these are food or drink additives of mostly botanical origin used in nutritionally insignificant quantities for flavoring or coloring.

This list does not contain salt, which is a mineral, nor is it for fictional plants such as aglaophotis, or recreational drugs such as tobacco.

This list is **not** for plants used primarily for herbal teas or tisanes, nor for plant products that are purely medicinal, such as valerian.
